ATEX-certification for accessories

In accordance with EC Directive 94/9/EC (ATEX)

We hereby declare that the

Products: Pneumatic accessories
Series: Mechanical and pneumatic accessories, shut-off and flow control valves, logic valves, fittings, tubing, P-supply manifolds and RPS manifolds, linear guides FEUG/FEHG/FEHK

have no intrinsic potential ignition sources and therefore do not come within the scope of Directive 94/9/EC for equipment or protection systems intended for use in potentially explosive atmospheres.

The above-named products can be used in compliance with Directive 94/9/EC (ATEX) according to Category 2 in hazardous areas of Zones 1, 2 or 21, 22, in consideration of permissible operating conditions of cylinders and valves.

The ATEX operating instructions for Parker-ORIGA pneumatic components must be observed, especially the important safety notes and instructions for their commissioning. Also the technical catalogue data for these products must be observed.

Modifications of the above-named products are not permissible, except with the express written agreement of the manufacturer.

If the above-named products are installed in a higher-ranking machine, the new risks arising from their installation must be assessed by the manufacturer of the new machine.

Electrical actuators and electrical accessories for pneumatic actuators, e.g. end position sensors or solenoids, must be tested for their intended application and approved and marked according to their protection class. The installation and operating instructions for these electrical components must be observed.
